HIGHLIGHTS OF QUALIFICATIONS

- Founder and lead engineer of CalGrid AI, a live AI analytics platform with a data pipeline, reporting engine, and RAG feature
- Measures AI before shipping: evaluated RAG answers on 13 test questions (13/13 accurate, 100% grounded), with cost monitoring
- Turns messy data into decisions with Python and SQL, dashboards, and executive reports for non-technical stakeholders
- Security-minded: threat modelling, risk assessment, and access controls from two cybersecurity externships
- Honours Computer Science student specializing in Data Analytics with a 3.7 GPA and Dean's Honour Roll in 2024, 2025 and 2026; available full-time from May 2027

TECHNICAL SKILLS

AI: Generative AI, LLMs, Retrieval-Augmented Generation (RAG), Embeddings and Vector Search, LLM Evaluation, Prompt Engineering
Data Engineering: ETL Pipelines, Data Modelling, Data Quality and Validation, APIs, PostgreSQL, pgvector, Supabase
Data & Analytics: Python (Pandas, Scikit-learn), SQL, Machine Learning, Tableau, Excel (Pivot Tables), Data Visualization
Security & Governance: Risk Assessment, Threat Modelling (STRIDE), Access Control, Responsible AI, Data Privacy, NIST CSF
Engineering: Next.js, React, JavaScript, Git, GitHub, Vercel, LLM Observability (Langfuse)
Currently Learning: AI Agents, Power BI

EDUCATION & CERTIFICATIONS

Bachelor of Science (Honours) in Computer Science | Data Analytics Specialization April 2027
Trent University Peterborough, Ontario

- GPA: 3.7 / 4.0 | Dean's Honour Roll - 2024, 2025 and 2026
- Relevant Courses: Data Mining, Database Management Systems, Big Data and Data Visualization (in progress), Artificial Intelligence (in progress)
- Certifications: CompTIA Security+ (in progress, exam December 2026)

EXPERIENCE

Founder & Lead Engineer, CalGrid AI April 2026 - Present
calgridai.com | *Peterborough, Ontario*

- Designed and built the data pipeline behind a live analytics platform, extracting client spreadsheet and Google Sheets data through API connectors, transforming and validating it, and loading it into PostgreSQL for reporting
- Modelled the relational schema and wrote the SQL behind the reporting engine, with automated validation to maintain data quality
- Shipped an "Ask your data" RAG feature (pgvector, embeddings, cited answers), evaluated on 13 questions including prompt-injection and unanswerable cases (13/13)
- Ran discovery interviews with small-business owners, turning their questions into AI use cases and product features
- Reviewed auth, data access, and payments for security gaps, fixing a permissive database policy; lead engineering with a contributor

Cybersecurity Risk Assessment Extern (vCISO Services) October 2026 - Present
Extern | *Internship* | *Remote*

- Defining assessment scope, reconciling conflicting client records into an asset inventory, scoring control gaps, and ranking risks for a medical billing client

Cybersecurity Extern, IoT Cyber Defense (Hydroficient) August 2026 - October 2026
Extern | *Internship* | *Remote*

- Built a STRIDE threat model and secured a live sensor pipeline with mutual TLS and HMAC message signing, blocking every simulated attack

Data Analyst Extern, Qualitative & Quantitative Insights (Beats by Dre) May 2026 - August 2026
Extern | *Internship* | *Remote*

- Cleaned a 4,990-row review dataset in Python and analyzed sentiment across five competing products to find what drives customer complaints
- Told the story to non-technical marketing stakeholders through a dashboard and executive presentation with three prioritized recommendations

PROJECTS

Customer Churn Prediction | Python, Scikit-learn January 2026 - February 2026

- Preprocessed 7,000+ telecom customer records and trained and evaluated three classification models in Python to predict churn, reaching 80.7% accuracy

WORK HISTORY

Facilities Assistant | Student Housing, Trent University April 2025 - Present
Service Centre Assistant | Student Housing, Trent University October 2024 - Present
