# MOHAMMED BELLO IBRAHIM

Peterborough, ON | (365) 833-9551 | mohammedibrahim@trentu.ca
linkedin.com/in/mohammed-bello-ibrahim-7521b62a2 | github.com/Bellomk77 | calgridai.com

## HIGHLIGHTS OF QUALIFICATIONS

- Hands-on data analytics experience across the full workflow, from data cleaning and SQL querying through exploratory analysis and machine learning to dashboard reporting for stakeholders
- Delivered a five-product competitive analysis for Beats by Dre that reframed a misdiagnosed product problem and produced three prioritized recommendations for marketing stakeholders
- Founder and lead engineer of CalGrid AI, a live AI-powered analytics platform that converts small-business data into plain-language reports, built and shipped end to end
- Honours Computer Science student specializing in Data Analytics with a 3.7 GPA and Dean's Honour Roll in 2024, 2025 and 2026, graduating June 2027

## TECHNICAL SKILLS

**Data Analysis & Visualization:** SQL, Excel, Tableau, Power BI, Google Sheets, Exploratory Data Analysis, Data Cleaning, KPI Reporting
**Programming Languages:** Python (Pandas, NumPy, Matplotlib, Scikit-learn), SQL, Java, C#, JavaScript, HTML/CSS
**Machine Learning & AI:** Logistic Regression, Random Forest, XGBoost, Clustering, Feature Engineering, Model Evaluation
**Databases & Dev Tools:** MySQL, PostgreSQL, Supabase, Git, GitHub, Jupyter Notebook, Google Colab, Vercel, VS Code
**Cybersecurity:** Threat Modeling, Risk Assessment, Network Security, IoT Security

## EDUCATION & CERTIFICATIONS

**Bachelor of Science (Honours) in Computer Science | Data Analytics Specialization** Expected June 2027
Trent University Peterborough, Ontario

- GPA: 3.7 / 4.0 | Dean's Honour Roll - 2024, 2025 and 2026
- Relevant Courses: Data Mining, Database Management Systems, Data Structures & Algorithms, Artificial Intelligence
- Certifications: Microsoft Azure Fundamentals (AZ-900) and CompTIA Security+ - in progress, targeting 2026-27

## EXPERIENCE

**Cybersecurity Extern, IoT Cyber Defense (Hydroficient)** August 2026 - Present
*Extern* | *Internship* | *Remote*

- Performing IoT asset discovery and threat modeling across a connected water-management deployment to map the client's exposed attack surface
- Assessing device and network-level risk to produce prioritized mitigation recommendations for client stakeholders

**Data Analyst Extern, Qualitative & Quantitative Insights (Beats by Dre)** May 2026 - August 2026
*Extern* | *Internship* | *Remote*

- Cleaned and validated a 4,990-row customer review dataset in Python (Pandas, NumPy), producing the analysis-ready dataset behind a five-product competitive study
- Benchmarked Beats against four competitors through exploratory data analysis, surfacing product fit as the key driver of negative sentiment and reframing it as a conversion gap, not a quality gap
- Delivered an interactive dashboard and executive presentation that gave marketing stakeholders three prioritized, data-driven recommendations for product positioning

**Founder & Lead Engineer, CalGrid AI** December 2025 - Present
*calgridai.com* | *Peterborough, Ontario*

- Designed, built, and launched an AI-powered analytics platform that turns small-business spreadsheet data into plain-language insight reports, taken from concept to live release as sole engineer
- Designed the PostgreSQL schema and queries behind the reporting engine, and shipped multi-file ingestion, Google Sheets import, authentication, subscription billing, and automated email reporting
- Ran discovery interviews with local small-business owners to gather requirements and prioritize the roadmap around the reporting needs they raised

## PROJECTS

**Customer Churn Prediction | Python, Scikit-learn, XGBoost** January 2026 - February 2026

- Analyzed 7,000+ telecom customer records using exploratory data analysis and feature engineering to identify the drivers of churn
- Built and compared Logistic Regression (80.7% accuracy), Random Forest, and XGBoost models, then translated feature importance into retention recommendations; published on GitHub

**Sales Performance Dashboard | Tableau** November 2025 - December 2025

- Cleaned and aggregated 10,000+ retail sales records, then built an interactive Tableau dashboard tracking Sales, Profit Margin, and Category KPIs by region
- Surfaced USD 2.29M in sales and USD 286K in profit across categories, identifying Technology as the top-performing segment; published to Tableau Public

## WORK HISTORY

Facilities Assistant | Student Housing, Trent University April 2025 - April 2026
Service Centre Assistant | Student Housing, Trent University October 2024 - April 2026
